

John Resig is an American software engineer and entrepreneur, best known as the creator and lead developer of the jQuery JavaScript library

# The Resig Team

Team Members: Jamal Bailey, Jake Beube, Denyse Huevo, David Wilson

# “Get me out of here!” – an Overview

## ➤ Description

- This app asks you enter an origin and destination of where you would like to travel and displays several travel mode options (fly, train, bus, drive) and estimates price, distance and duration. We've also incorporated a map and weather information.
- It is geared toward the cost-conscious consumer to help them to understand their options in selecting their travel

## ➤ Motivation

- The marketplace of apps available for travel always expect you to know the mode of transportation before you start a search. Perhaps consumers would make different choices if they knew they were available.

## ➤ Results

- Cost-conscious consumers are provided various ways to reach their destination (example – MegaBus, Bus Cubana, etc) that are featured in the routes presented. The typical search gives you 6 or more ways to get from point 'A' to point 'B'. This app quite simply provides you those options so you can make a better informed search based on price and other factors.

# The Demo...

# The Team & Roles

- Introducing the team members, their role & challenges experienced:
  - Jamal Bailey – Weather API
  - Jake Beaubé – Bootstrapmade.com (the “sizzle”)
  - Denyse Huezo – Google Map API
  - David Wilson – Rome2Rio API
- Technical Specs review:
  - 3 API's used
  - New technology used – Bootstrapmade
  - Mobile friendly
- Improvements
  - Version 1 was developed “agile-like” for prototype evaluation
  - Other features which would improve Version 2 include integration of “trip advisor-like” functionality and an extended weather forecast, hooks to travel partners

# The End

Or is it the beginning???
